

## Why Oscar Furniture?

Oscar have decades of experience in manufacturing furniture.

Anthony Op de Coul built the business with his father Leo and carries on a proud family tradition of quality without compromise.

**Australian Made:** Hudson and Barwon chairs are made in Horsham, Australia to the highest standard.

Start with the chair in a comfortable standard seating position.

Elevate the feet to reduce pressure on the lower back.

Fully recline the chair for a comfortable sleeping position.

Elevate the chair to assist with sitting and standing.

## Choose from "Wall-saver" or "Independent recline" actions

### Wall-saver

The single motor wall saver operation of the Hudson and Barwon allows the chair to move forward while the backrest reclines. This Oscar feature reduces the space that the chair occupies in the room because the reclined backrest does not hit the wall. Lift, recline and footrest operate from one motor.

### Independent recline

Dual motor option lets the user recline the back without effecting the footrest, allowing a greater range of comfort. This option also increases range of motion to get a completely lay-flat back.

## Hudson or Barwon?

### Barwon three-roll back.

Top two rolls are filled with a fibrous filling that has a wonderful soft feel. Bottom roll is a supportive foam

Barwon is the ultimate in softness and luxury.

### Hudson has a two-roll back.

The lower back pad is made from foam and has better lower back support.

Hudson especially suits people recovering from back surgery or general lower back pain.

### Hudson\* Brumby style back

Hudson is available with the classic 'Brumby' style double large roll back on request.

For Customers who love our classic Brumby look.

Barwon and Hudson come standard with a velcro attached back cushions. The velcro makes it cheap and easy to clean or replace cushions on site, and can help make minor adjustments to their positions on delivery.

oscar  
FURNITURE

Available as electric or manual operation and with a lift capacity of 130 kilograms, they suit most clients.

A single use 9V battery is fitted as standard so that in an emergency, the chair can be returned to rest.

When selected as "Wall Saver" the chair is simple to use with just one button for up and another for down.

When selected as "Independent" the backrest is operated by a separate set of up and down buttons.
