Exceptionally Tailored Experience

Scripted and built to fit you!
In your choice of colours and materials

Experience the Barwon

Experience Weightlessness

Precision Engineering, Total Relaxation

The Barwon uses a precision tilt-in-space motion to glide you into the Zero Gravity position. Unlike a standard recliner that simply leans your back away from your seat, the Barwon tilts your entire body as one, maintaining a consistent, supportive angle between your hips and back. This carefully engineered motion mimics the posture astronauts use during launch, reducing pressure on the spine and joints while providing stable, controlled movement at the touch of a button.

Evidence based solution for complex seating needs

The Barwon's tilt-in-space mechanism provides a posterior tilt, which is essential for facilitating a functional weight shift away from the sit bones and sacrum. By maintaining a constant seat-to-back angle during the tilt, the Barwon prevents the patient from sliding forward, effectively eliminating the friction and "shearing" forces that lead to skin breakdown.

This stability makes it a superior choice for patients with limited trunk control, those at risk of pressure injuries, or those requiring elevation to manage lower-limb oedema. Barwon allows for precise positioning that supports better respiratory function and safer swallowing, giving you a reliable, evidence-based solution for your patients.

How the Barwon Transforms Your Rest

By gently placing your body in a zero-gravity position, the chair takes pressure off your back and joints and allows your muscles to relax naturally. Your weight is evenly supported, helping improve circulation, reduce tension, and make breathing feel easier, especially when sitting for longer periods. The result is more comfort, more energy, and greater overall ease, giving you a light, supported feeling that is ideal for relaxing, recovering, or simply enjoying everyday comfort.

Made in Australia.
Your Perfect Fit.
Made for You.

Barwon Lift Recliner

The Barwon is a Lift-Recline Chair, the first choice for value in a high-quality Australian made lift chair. Choose from four standard chair size and an extensive range of feature adjustments to achieve a completely personalised fit and ensure comfortable usage. Every chair is fitted with carefully tested and selected electrical components and can be upholstered in your choice of premium fabric from Oscar's very own Versotela range.

Comfort and care combined in one seamless seating experience

- Up to 180kg weight capacity
- Up to 5 Independent Motors
- Easy-to-Use Remote Controller
- Full battery backup
- Smooth mobility in every room
- Comes standard with Velcro attached back cushions
- Available in wide range of Leather and Versotela fabrics
- 2 Year Warranty on mechanism, electrics and fabric
- Made to measure
- 5 Year Warranty on timber frame
- 100% manufactured in Australia by Oscar Furniture

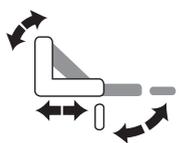

Design

The Barwon comes standard with Velcro attached back cushions. The Velcro makes it easy to clean or replace cushions on site, and can help with minor adjustments to the cushion's position and fill.

Barwon three-roll back.

The top two rolls are filled with a fibrous filling that has a wonderful soft feel. Whilst the bottom roll is filled with a supportive foam. Barwon is the ultimate in softness and luxury.

Actions

Single Motor (Wall-saver, Lift Assist)

The single motor wall saver operation of the Barwon allows the chair to move forward while the backrest reclines. This Oscar feature reduces the space that the chair occupies in the room because the reclined backrest does not hit the wall. The Lift, recline and footrest operate from one motor.

Dual Motor (Independent Recline)

Dual motor option lets the user recline the back without effecting the footrest, allowing a greater range of comfort.

Barwon 5 Force Upgrade

Experience the Barwon Signature 5-Motor design, where five independent power systems work in harmony to create a custom-tailored seating experience.

Take control of your comfort. Barwon's Quad-Power technology features four independent motors designed for infinite recline positioning. Whether you need extra spinal support or a perfectly angled view of the TV, our 4-motor system delivers calibrated alignment at the touch of a button.

The addition of the Tilt-in-Space function introduces a dedicated fifth motor for enhanced support. This advanced feature gently tilts the entire chair while maintaining your natural seated posture, promoting improved pressure redistribution, supporting healthy circulation, and enabling smooth, effortless repositioning for lasting comfort throughout the day.
